zygo.cash

Earn globally.
Pay locally.

Spend USDC at any local QR code. The merchant gets paid in local currency, in seconds.

COLOSSEUM HACKATHON

BUILT ON SOLANA

Cashing out crypto today is a gamble.

Most people sell to a stranger on a P2P desk and wait for a bank transfer. Every step costs them.

FROZEN ACCOUNTS

One bad buyer can lock your bank account.

P2P deposits come from unknown counterparties. If those funds are flagged as malicious, the receiver's account gets frozen.

HEAVY TAX

Up to 30% in India, plus 1% TDS.

Every sell-and-withdraw cycle is a taxable event, and rules shift country by country.

BAD FOREX

Hidden spreads on every conversion.

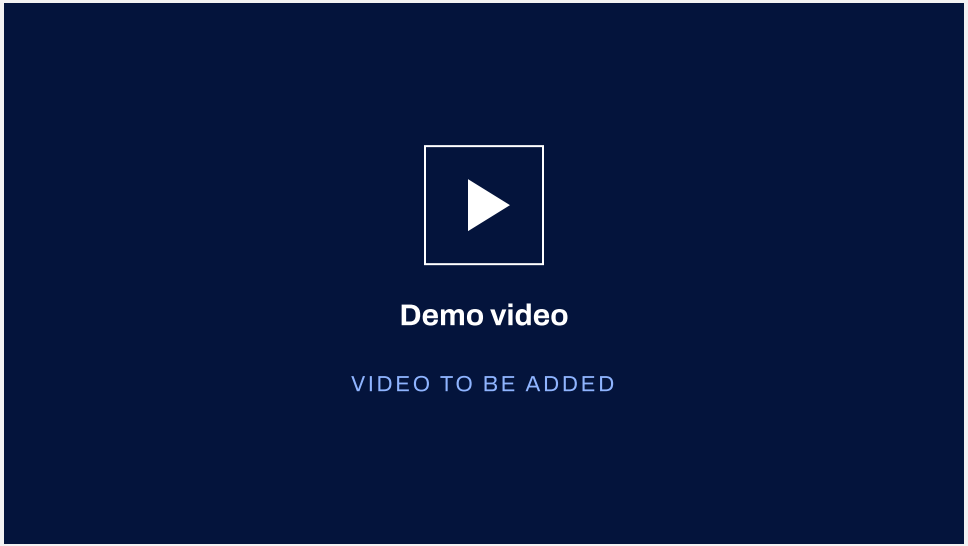

P2P desks and exchanges price well above the market rate, and users rarely see the true cost upfront.

Don't cash out. Just pay.

	P2P BANK TRANSFER	ZYGO
Your bank account	Receives money from strangers — at risk of freezes	**Never touched. Verified providers pay the merchant directly**
The rate	Negotiated per trade, spreads hidden	**One quote with the full USDC cost, shown before you approve**
Safety	Trust the counterparty and hope	**USDC held in Solana escrow until the payout is verified**
Spending	Sell, withdraw, wait, then spend	**Scan any local QR and pay — one step, with a clean record**

A merchant payment, end to end.

STEP 1	Customer scans the merchant's existing QR code.
STEP 2	Zygo shows the local amount and the total USDC cost.
STEP 3	USDC moves into escrow; a matched provider is reserved.
STEP 4	The provider pays the merchant in local currency.
STEP 5	Payout is verified; escrow releases the USDC.

Watch a live payment from scan to settlement.

Crypto that's easy to hold, manage and spend — anywhere.

EARNERS

Keep dollars, spend local

Freelancers and remote workers hold USDC and pay for daily life without a risky cash-out.

MERCHANTS

New customers, zero setup

Paid in local currency through the QR they already have. Nothing to install.

PROVIDERS

Steady, verified flow

Local liquidity partners earn on every completed payment, settled safely through escrow.

SOLANA

Real-world USDC utility

Fast, low-cost settlement turned into everyday payments at the counter.

India first. Then the rest of Asia.

India

$129B

Remittances received in 2024 — the world's largest

15M

Freelancers — the second-largest pool after the US

Gig workforce projected to reach 23.5M by 2030.

Asia-Pacific

$375B

Remittances flowing into Asia in 2024

~19%

Yearly growth in APAC freelancing

Philippines, Vietnam and Indonesia lead Southeast Asia's freelance exports.

Sources: World Bank (2024), NITI Aayog, industry estimates.

Early users, real volume.

150

Private beta users

$120K

Volume processed in the last 4 weeks

Liquidity providers 10 onboarded

Our network, insideother people's products.

Two APIs turn partners users into Zygo volume.

PAYOUT API

For card providers in remittance and employee payments

Fund in USDC once, deliver local currency to families, staff and contractors across supported countries.

QR PAYMENTS API

For crypto card companies

Let cardholders scan and pay at UPI and other local QR networks, where cards aren't accepted.
